

Artist / Kunstner

At Bethien A/S we are not only agency and producer of paper and board for school and offices in Europe – we also have an artist's pad production. Our production assortment includes all types of pads, and we sell them both in Denmark and in all the Nordic countries. We produce an average of 250.000 artist's pads a year at our production located in Roskilde, Denmark..

Furthermore, we can also offer a wide range of other artist's products, either wholesale or as an agency for our various trade partners. Our production is FSC Certified, as well as Swan certified.

Due to our production and market position, we can therefore offer a uniquely wide range of products, including board, paper, pads, Copic Markers, and much more.

Her hos Bethien A/S er vi ikke blot agentur og producent af papir og karton til skoler og kontorer i Europa – vi er også producent af kunstner blokke. Vores produktion inkluderer alle typer blokke og vi sælger både lokalt i Danmark og til Norden. Vi laver årligt omkring 250.000 kunstnerblokke i vores produktion i Roskilde.

Udover blokproduktionen kan vi også tilbyde en bred vifte af andre kunstnerprodukter, enten som grossist eller agentur. Vores produktion er FSC certificeret samt Svane certificeret.

På grund af vores produktion og position på markedet kan vi altså tilbyde en meget bred vifte af produkter, som inkluderer pap, papir, blokke, Copic markers, og meget andet.

App for managing your Copic collection

Quick and easy access to your Copic collection. Manage your Copic markers from anywhere, anytime.

iOS | Android

Printed colors in this color listing are different from actual colors of marker ink.

[Appropriate storage method for Copic-artwork]
Keep it away from direct sunlight/ultraviolet rays as much as possible. Store in a dry, cool dark place.

[About the combined use of Copic and other art materials]
Always check the compatibility before start your project.

Characteristics of dye ink: Dye is artificial material made through chemical processes and it's not as archival as pigment products. Dye has a material property of discoloring itself. Also dye is susceptible to ultraviolet ray and high temperatures, in general. Copic ink is dye ink and if artwork with Copic is exposed to direct sunlight or fluorescent light, ink will gradually fade and color will change.

COPIC 358 colors

COPIC® classic

Copic Classic is the very first marker of Copic family.
For decades, Classic has been favored by professional
designers of architecture/product/fashion/interior/etc all around the world.
